

## Incident Response

### TO PROTECT YOUR TEAM, WE BECOME AN EXTENSION OF IT.

Clarity's SOC|XDR platform continuously correlates, stitches, and integrates every layer of your technology stack to detect, monitor and respond to cyber threats before you're breached.

We understand that when your security is on the line, you can't afford to react slow. Our **Incident Response** service empowers our analysts with detailed data from across all endpoints allowing them to respond to threats quickly. Our experienced forensic consultants combined with leading-edge technology drives our ability to provide our clients with efficient and effective resolution.

### ALWAYS ON. ALWAYS WORKING. ALWAYS PROTECTING YOU.

#### Contain & Control

Clarity's SOC analyst team will identify the initial steps to contain and control an incident and help you execute a proactive response plan by providing detailed recommendations on how to proceed.

#### Identify & Understand

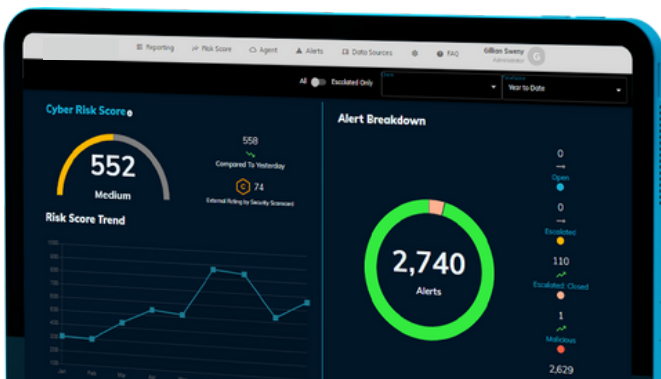

Clarity SOC analysts will use propriety technology to identify and document the threat, suggest a course of action, and remediate the weakness that played a part in causing the breach.

#### Remediate & Recover

Clarity's SOC analysts are here to help you through a data breach, recover your data, and restore your systems and networks, so you can sleep at night. Clarity is your trusted cybersecurity partner.

### HAVE YOU EXPERIENCED A BREACH?

If your organization has been hit with a ransomware attack or another type of data breach, please contact our Customer Success team *immediately* so we can begin protecting you.

You have a lot to worry about--our Incident Response is another Clarity technology that helps you sleep at night.
